Overview

Web Service Reports

The NFN Daily List is a web-based data product offered by Nasdaq Information, LLC. The NFN Daily List is designed to provide the market data community with issue level security details for NFN instruments. This Nasdaq product includes NFN-related reports:

1. **NFN Daily List:** This component provides advance notification of NFN registration actions such as new instruments, deleted instruments and instrument attribute changes. For the Daily List component, Nasdaq will generate two daily files:
 - a. **Daily List – Advance Notifications:** This file will include all NFN registration actions that were approved by NFN Operations on the current business date for a future System effective date.
 - b. **Daily List – Next Business Day Changes:** This file provides only those NFN registration actions scheduled to take effect on the next business date.
2. **Instrument Directory:** This component file provides security level information for all active instruments in the NFN system at the beginning of the current business day.
3. **Product Directory:** This component provides fund level information for instruments as provided by NFN Issuers. This directory updates every day at the beginning of the current business day.
4. **Issuer Directory:** This component provides a list of all active NFN issuers and the applicable issuer data such as Issuer Description, Assets Under Management, Investor Relations contact information, etc. This directory updates in real time.
5. **Documentation Posting Service:** Nasdaq allows NFN issuers to post prospectus, statements of additional information (SAI), semi-annual and annual reports, and money market monthly financial statements in PDF format for market data vendors to access. Each day, Nasdaq will generate a file defining new NFN documents available for download.
6. **Ex Date Report:** Nasdaq allows NFN pricing agents to enter advance notifications of Dividend/Interest and Capital Distribution actions. To ensure that the market data community can access these corporate actions on the appropriate ex-date, Nasdaq plans to add an Ex-Date report to the NFN web product.

Please note that the NFN Daily List includes CUSIP numbers. Firms must have an agreement in place with the CUSIP Bureau and appropriate NFN entitlement token in order to see the CUSIP values within the NFN files.

Secured Website Access

Nasdaq offers NFN website access to NFN Daily List subscribers. Through the NFN website, firms may download all the reports listed above. In addition, Nasdaq will offer the following functionality via the NFN website:

- Search capabilities for the Instrument Directory and Daily List products.
- Ability to view intra-day NFN reporting statistics.
- Ability to download monthly NFN reports such as Instrument counts by pricing agent, Instrument counts by issuer, Updates by instrument type and Updates by time interval.

Firms should be able to log into the NFN website at <https://nfn.nasdaq.com> to take advantage of the new functionality. For details on the NFN website functionality, please reach out to [NFNOps@nasdaq.com](mailto:NFNops@nasdaq.com).

Architecture

General Information

As of **November 22, 2021**, Nasdaq will allow NFN – Nasdaq Fund Network users to use JWT bearer token to call valuation reports.

In addition, NFN adopted MFA – Multi-Factor Authentication to access the NFN Web Service. NFN Data Service Valuation Report users no longer require valid security certificate. Please contact [Nasdaq Trading Services](#) at +1 212 231 5180 if you need assistance enrolling into MFA or password reset.

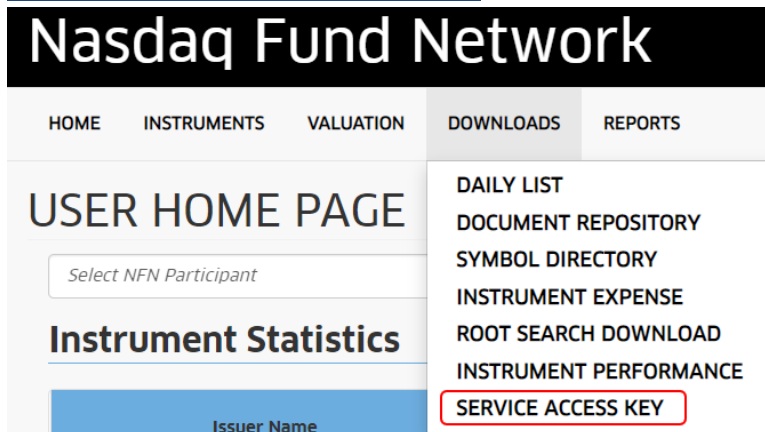

NFN Pricing Agents loading Valuation in to NFN and Vendors pulling Valuation Reports, Today's Price History and Ex-Date Report should continue with the instructions below until further notice. NFN issuers and Vendors pulling down web reports NFN Daily List, NFN Symbol Directory, NFN Product Report (pka Root Download), NFN Document Posting and Issuer report should follow the instructions announced below for the November 18th, 2024 release.

Please visit <https://nfn.nasdaq.com> and follow instruction to enroll in MFA logon.

Follow these steps to generate JWT bearer token:

First, users need to generate permanent access key which will be used to generate temporary JWT bearer token later. This access key will expire after one year.

- Login to NFN Web Service and navigate to Download → Service Access Key page <https://nfn.nasdaq.com/ServiceAccess.aspx>

- Click Generate Service Access Key button as shown in the following screenshot
- System will generate a Current Active Key as shown below
- Copy the Current Active Key

Second, to generate temporary JWT token:

- End point URL: <https://nfn.nasdaq.com/servicecall/tempession>
- Http method: POST
- Content-Type should be "application/x-www-form-urlencoded"
- Form field: username, password, accesskey
- Enter username, password and paste the accesskey copied from the NFN Web Service in step one.
- Expected output: JSON {"data": "[JWT value]"}
- Sample output
{"data": "eyJhbGciOiJIodHRwOi8vd3d3LnczLm9yZy8yMDAxLzAOL3htbGRzaWctbW9yZSNobWFjLXNoYTI1NiIsInR5cCI6IkpXVCJ9.eyJsb2FkIjoizTI2SUVidHNMNIBxbC9veGMvaHp6WDhCMWVNVm8ydGRaVFA5YkNlc1NRS0pFbnpyWExJanVBK282RE9XR085ciJ9.L9ZjysPJgB9tiYtuDAcUdFTSxPIITpUTMnc_QBovH-M"}
- Temporary token will expire in 30 minutes of inactivity

The NFN Registration Service data files will be accessible to subscribers via Secured Web Service. In order to access the files, NFN Daily List subscribers must have a valid access key, user ID and password from Nasdaq.

Nasdaq strongly recommends that firms create web service calls to retrieve the NFN Daily List and NFN Instrument Directory files.

Nasdaq has modified the authentication process for fetching files from the NFN Secure Web Service.

All programmatically generated calls should contain client access key issued by Nasdaq

For security reasons, Nasdaq recommends that firms access the NFN web services via "POST" (user credentials passed via form post) method. The following is an example call that can be used to retrieve files:

Sample code calls

The following is an example call that can be used to retrieve files:

Sample code call in Powershell:

```
Add-Type -AssemblyName System.Web
##### Step One Establish Temp Session and retrieve JWT#####
$username = "*****"
$password = "*****"
$accesskey = "*****"
$url="https://nfn.nasdaq.com/servicecall/tempession"
$body = @{}

```

```
$body.add("username",$username)
$body.add("password",$password)
$body.add("accesskey",$accesskey)
```

```
## It is assumed that correct credentials used no error checking is provided
```

```
$response = (Invoke-WebRequest -Uri $url -ContentType "application/x-www-form-urlencoded" -Body $body -
Method POST -UseBasicParsing).Content | ConvertFrom-Json
$json = $response.data
```

```
##Write-Output $json
```

```
##### Step Two configure and make call to the service #####
##### In this case we are using valuation service and write output in temp file #####
```

```
$dict=@{}
$dict.add("Content-Type", "application/json")
$dict.add("Authorization", [string]::Format("Bearer {0}", $json))
```

```
curl -Headers $dict "https://nfn.nasdaq.com/servicecall/InstrumentDirectory.ashx?Date=11-29-2010&Type=pipe "
-o "c:\temp\temp.txt"
```

Sample code call in Python

```
## Imports
import requests
import json

## Put Login Details
username='*****'
password='*****'
accesskey='*****'
```

```
# Authenticate
url_new = "https://nfn.nasdaq.com/servicecall/tempsession"
```

```
payload = {'username': username, 'password': password, 'accesskey': accesskey}
headers = {'Content-Type': 'application/x-www-form-urlencoded'}
response = requests.post(url_new, data=payload, headers=headers)
```

```
#extract JWT
data = json.loads(response.text)
jwt_token=data['data']
```

```
url='https://nfn.nasdaq.com/servicecall/DLNextDay.ashx?type=CSV'
headers = {'Content-Type': 'application/json', 'Authorization': 'Bearer ' + jwt_token}
response = requests.request('GET', url, headers=headers)
```

```
## Work with response  
print(response.text)
```

In the sample code above, clients need to make the necessary adjustments in the highlighted text. For example, client should replace username and password with their unique assigned logon credentials from Nasdaq. Clients also need to present an Access key. Clients should replace the code report parameters as needed.

End Point: RefreshKey

- NFN has added an endpoint for Users to refresh their Service Access Key via POST.
- To Create initial Access key user still needs install TOTP app on the phone and generate Access key using same process they are using now.
- New end point is: <https://nfn.nasdaq.com/servicecall/refreshkey>.
- In order to use endpoint above, the user must establish session by Posting username, password, VALID not Expired Access Key (<https://nfn.nasdaq.com//servicecall/tempession>)

No parameters post to <https://nfn.nasdaq.com/servicecall/refreshkey> should be done. Post should have Authorization header with Valid not Expired bearer JWT token generated in temp session call. In response user will receive following data:

```
{  
  "Key": "1IOX0Uvrhx0l8iHbv0k79N3clmV3b0RdUdmP1Adt5DLRqW8kv6tTgi9PPAHvRR3Wg7STtG7/Ohnu+zXJ0wC  
GbQ==",  
  "Expired": "2024-02-01T15:04:09.5092681-05:00"  
}
```

IMPORTANT NOTES:

- This will need to be done by the user **PRIOR** to the current Access Key expiring. If the current key has expired the user will have to log in to <https://nfn.nasdaq.com> using MFA and regenerate the Access Key manually.
- Once refreshed, the previous Access Key will be invalidated. If the user did not save new Access Key, the user will have to login to <https://nfn.nasdaq.com> using MFA and retrieve/regenerate the Access Key manually.
- Once the new Access Key is generated, the temporary session used to do so will be terminated. The user will need to re-establish new session using new Access key.

New process for the following reports as of November 18, 2024:

- **NFN Daily List**
- **NFN Symbol Directory**
- **NFN Product Download (pka Root Download)**
- **NFN Issuer Report**
- **NFN Document Posting**

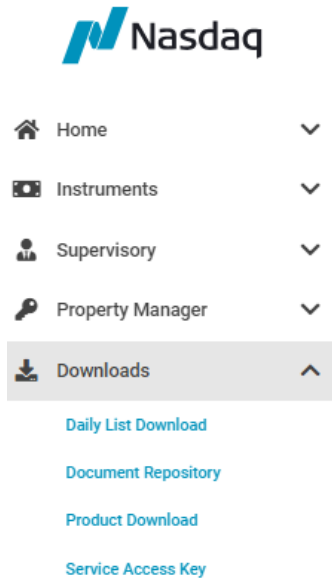

Please visit <https://newnfn.nasdaq.com> and follow instruction to enroll in MFA logon.

Follow these steps to generate JWT bearer token:

First, users need to generate permanent access key which will be used to generate temporary JWT bearer token later. This access key will expire after one year.

- Login to NFN Web Service and navigate to Download → Service Access Key page <https://newnfn.nasdaq.com/ServiceAccess.aspx>

- Click Generate Service Access Key button as shown in the following screenshot
- System will generate a Current Active Key as shown below
- Copy the Current Active Key

Second, to generate temporary JWT token:

- End point URL: <https://api.nfn.nasdaq.com/servicecall/tempession>
- Http method: POST

NFN Daily List

- Content-Type should be "application/JSON"
- Body: {"username":"[username]","password":"[password]","accesskey":"[accesskey]" }
- Enter username, password and paste the accesskey copied from the NFN Web Service in step one.
- Expected output: JSON {"data": "[JWT value]"}
- Sample output
{"data":"eyJhbGciOiJIodHRwOi8vd3d3LnczLm9yZy8yMDAxLzA0L3htbGRzaWctbW9yZSNoZWJjLXNoYTI1NiIsInR5cCI6IkpXVCJ9.eyJjb2FkljoiZTI2SIVIdHNMNiBxbC9veGMvaHp6WDhCMWVNVm8ydGRaVFA5YkNlc1NRS0pFbnpyWExJanVBK282RE9XR085ciJ9.L9ZjysPjgB9tiYtuDAcUdFTSxPIITpUTMnc_QBovH-M"}
- Temporary token will expire in 30 minutes of inactivity

The NFN Registration Service data files will be accessible to subscribers via Secured Web Service. In order to access the files, NFN Daily List subscribers must have a valid access key, user ID and password from Nasdaq.

Nasdaq strongly recommends that firms create web service calls to retrieve the NFN Daily List and NFN Instrument Directory files.

Nasdaq has modified the authentication process for fetching files from the NFN Secure Web Service.

All programmatically generated calls should contain client access key issued by Nasdaq

For security reasons, Nasdaq recommends that firms access the NFN web services via "POST" (user credentials passed via form post) method. The following is an example call that can be used to retrieve files:

Sample code calls

The following is an example call that can be used to retrieve files:

Sample code call in Powershell:

```
Add-Type -AssemblyName System.Web
##### Step One Establish Temp Session and retrieve JWT#####
$username = "*****"
$password = "*****"
$accesskey = "*****"
$baseurl="https://api.dev.nfncloud.us-east-1.aws.nasdaq.com"
$accept="text/csv"
$savepath="C:\temp\temp.csv"

$url="$baseurl/servicecall/tempession"

$body = '{"userName": "$username", "password": "$password", "accessKey": "$accesskey"}'

write-output $body

## It is assumed that correct credentials used no error checking is provided

$response = (Invoke-WebRequest -Uri $url -ContentType "application/json" -Body $body -Method POST -
UseBasicParsing ).Content | ConvertFrom-Json
$jwt = $response.data
Write-Output $jwt
```

Step Two configure and make call to the service #####
 ##### In this case we are using valuation service and write output in temp file #####

```
$dict=@{}
$dict.add("Content-Type", "application/json")
$dict.add("Accept", "$accept")
$dict.add("Authorization", [string]::Format("Bearer {0}", $jwt))

$url="$baseurl/servicecall/issuerdirectory"
```

```
$result = (Invoke-WebRequest -Uri $url -Headers $dict -Method GET -UseBasicParsing).Content #| ConvertFrom-Json
```

```
Out-File -FilePath "C:\temp\temp.txt" -InputObject $result -Encoding utf8
```

Sample code call in Python

```
## Imports
import requests
import json

## Put Login Details
username='*****'
password='*****'
accesskey='*****'

# Authenticate
url_new = "https://api.nfn.nasdaq.com/servicecall/tempsession"

payload = {'username': username, 'password': password, 'accesskey': accesskey}
headers = {'Content-Type': 'application/JSON'}
response = requests.post(url_new, data=payload, headers=headers)

#extract JWT
data = json.loads(response.text)
jwt_token=data['data']

url='https://api.nfn.nasdaq.com/servicecall/DLNextDay.ashx'
headers = {'Content-Type': 'application/json', 'Authorization': 'Bearer ' + jwt_token}
response = requests.request('GET', url, headers=headers)

## Work with response
print(response.text)
```

In the sample code above, clients need to make the necessary adjustments in the highlighted text. For example, client should replace username and password with their unique assigned logon credentials from Nasdaq. Clients also need to present an Access key. Clients should replace the code report parameters as needed.

End Point: RefreshKey

- NFN has added an endpoint for Users to refresh their Service Access Key via POST.

NFN Daily List

- To Create initial Access key user still needs install TOTP app on the phone and generate Access key using same process they are using now.
- New end point is: <https://api.nfn.nasdaq.com/servicecall/refreshkey>.
- In order to use endpoint above, the user must establish session by Posting username, password, VALID not Expired Access Key (<https://api.nfn.nasdaq.com/servicecall/tempsession>)
- No parameters post to <https://api.nfn.nasdaq.com/servicecall/refreshkey> should be done. Post should have Authorization header with Valid not Expired bearer JWT token generated in temp session call.

In response user will receive following data:

```
{  
  
  "Key": "1IOX0Uvrhx0l8iHbv0k79N3clmV3b0RdUdmP1Adt5DLRqW8kv6tTgi9PPAHvRR3Wg7STtG7/Ohnu+zXJ0wC  
GbQ==",  
  
  "Expired": "2024-02-01T15:04:09.5092681-05:00"  
}
```

IMPORTANT NOTES:

- This will need to be done by the user **PRIOR** to the current Access Key expiring. If the current key has expired the user will have to log in to <https://newnfn.nasdaq.com> using MFA and regenerate the Access Key manually.
- Once refreshed, the previous Access Key will be invalidated. If the user did not save new Access Key, the user will have to login to <https://newnfn.nasdaq.com> using MFA and retrieve/regenerate the Access Key manually.
- Once the new Access Key is generated, the temporary session used to do so will be terminated. The user will need to re-establish new session using new Access key.

Hours of Operation

The NFN web service reports outlined in this document are available for download from Monday mornings at 12:00 a.m., Eastern Time (ET) through Friday evenings at 11 p.m., ET.

The NFN posting times for each report are as follows:

Report Name	Initial Posting Time	Final Posting Time	Notes
NFN Daily Lists – All Versions	Between 11:00 a.m., ET and 1 p.m., ET	6:00 p.m., ET	Nasdaq attempts to post file by 12 noon, ET. After initial posting, Nasdaq attempts to limit the NFN Daily List changes to corrections only.
Instrument Directory	7:00 a.m., ET		Since the NFN Symbol Directory contains only active instruments, it is rare for the contents to change intraday.
Ex-Date Report	8:00 a.m., ET	8:05 p.m., ET	Nasdaq dynamically updates the Ex-Date report as pricing agents enter dividend and capital distribution data into the NFN system. For the most complete data, Nasdaq recommends that firms pull the report after 8:05 p.m., ET

Release Notes

Upcoming Changes

On or about **May 19, 2025**, NFN is adding two new fields to the NFN Daily List and NFN Symbol Directory:

Field Name	Field Format
Authorized Shares	12 Characters, alphanumeric
Authorized Shares Date	Date, MM/DD/YYYY

Nasdaq will add 4 new fields to the NFN Product Directory:

Field Name	Field Format
Trustee	Text up to 75 characters
Investment Advisor	Text up to 75 characters
Sub Advisor	Text up to 75 characters
Investment Strategies	Text up to 50,000 characters

Nasdaq will add the following to the Deletion Reason field:

Code	Value
D	IPO - Initial public offering
F	M&A - Mergers and acquisitions

NFN Daily List

G	Restructured
H	Bankruptcy

Past Changes

- Launch of the New.NFN Secure Web Service on or about **November 18, 2024**
- New NFN URL for registration site: <https://newnfn.nasdaq.com> on or about **November 18, 2024**
- New NFN URL for NFN Web Service Calls: <https://api.nfn.nasdaq.com/servicecall/> on or about **November 18, 2024**
- Announcing changes to the NFN reports detailed in their respective tables below on or about **November 18, 2024**
- Replacement of NFN NextShares to Private Stock, and changes to Instrument Code Values for two Alternative Investment Product on or about **January 13, 2025**

NFN Daily List(s)

Web Service Parameters

To retrieve the NFN Directory, Web Service Users shall need to enter a call with the following parameters:

- **Daily List File Name:** As noted below, Nasdaq offers two versions of the NFN Daily List. User should specify “DLAdvance” or “DLNextDay”.
- **Date of Daily List:** Data should be entered in MM-DD-YYYY or MM/DD/YYYY format.
- **Symbol for Daily List:** Data should be 5-11 characters, following the symbol format requirements.
- **File Type:** Data should indicate requested file format. Options: “XML” for XML formatted text, “pipe” for pipe (|) delimited text, “CSV” for CSV formatted text, or “JSON” for a JSON format.
 - File type will be requested via Accept HTTP Header. Supported values for Accept Header are: text/csv, text/json, text/pipe, text/xml

<https://nfn.nasdaq.com/servicecall/DLAdvance.ashx?Date=MM-DD-YYYY&Type=pipe>

<https://nfn.nasdaq.com/servicecall/DLNextDay.ashx?Date=MM-DD-YYYY&Type=pipe>

<https://nfn.nasdaq.com/servicecall/DLAdvance.ashx?Symbol=XXXXXXXXXX&Type=pipe>

<https://nfn.nasdaq.com/servicecall/DLNextDay.ashx?Symbol=XXXXXXXXXX&Type=pipe>

New NFN Web Service calls as of November 18, 2024:

<https://api.nfn.nasdaq.com/servicecall/DLAdvance.ashx?Date=MM-DD-YYYY>

<https://api.nfn.nasdaq.com/servicecall/DLNextDay.ashx?Date=MM-DD-YYYY>

<https://api.nfn.nasdaq.com/servicecall/DLAdvance.ashx?Symbol=XXXXXXXXXX>

<https://api.nfn.nasdaq.com/servicecall/DLNextDay.ashx?Symbol=XXXXXXXXXX>

NFN Daily List File Format

Each business day, Nasdaq will post two NFN Daily List files with the same basic file format:

NFN Daily List

- NFN Daily List – Advance Notifications:** This file will include all NFN registration actions that were approved by NFN Operations on the current business date regardless of the effective date. This advance notification file will be stored as a pipe-delimited text file. For the Web Service file name parameter, please use **DLAdvance**.
- NFN Daily List – Next Business Day Changes:** This file provides only those NFN registration actions scheduled to take effect on the next business day. This next day file will be stored as a pipe-delimited text file. For the Web Service file name parameter, please use **DLNextDay**.

The file format for both files will be the same. The NFN Daily List files will include a message header row with the field headings. Following the message header row, the individual security-level records will be sorted in ascending order by System Effective Date and then ascending alphabetic order by Symbol field.

As the last record in the file, the system will provide the Web Service parameters as well as the Note for the Day.

Security Level Details

Data Field	Field Format	Description											
Posting Date	Date, MM/DD/YYYY	Denotes the date on which the NFN Daily List record was generated. Date field is stored in MM/DD/YYYY format.											
Posting Time	Time, HHMMSS	Denotes the time that the NFN Daily List entry was generated or last updated. The time will be stated in HHMMSS format. The time is based on US Eastern Time.											
System Effective Date	Date, MM/DD/YYYY	Denotes the date that the NFN instrument registration change will be effective in the NFN system. Date field is stored in MM/DD/YYYY format.											
Event Code	Text up to 50 characters	Indicates the type of registration action associated with the NFN instrument. Allowable values are: <table border="1" style="margin-left: 20px;"> <thead> <tr> <th style="text-align: center;">Event Codes</th> </tr> </thead> <tbody> <tr><td>Addition</td></tr> <tr><td>Deletion</td></tr> <tr><td>Replacement</td></tr> <tr><td>Attribute Change</td></tr> <tr><td>Restore</td></tr> <tr><td>Withdraw – Addition</td></tr> <tr><td>Withdraw – Deletion</td></tr> <tr><td>Withdraw – Replacement</td></tr> <tr><td>Withdraw - Attribute Change</td></tr> <tr><td>Withdraw – Restore</td></tr> </tbody> </table>	Event Codes	Addition	Deletion	Replacement	Attribute Change	Restore	Withdraw – Addition	Withdraw – Deletion	Withdraw – Replacement	Withdraw - Attribute Change	Withdraw – Restore

For restore actions, this field will reflect the Minimum Initial IRA for the instrument being reinstated to the NFN system.
Canadian Identifier – Current	25 characters, alphanumeric	Denotes the Canadian identifier for the NFN instrument at the time of Daily List posting. Note: This field is only available for NFN instruments with the Registration Body of CSA (Canadian Securities Administration)
Canadian Identifier – New	25 characters, alphanumeric	Denotes the Canadian identifier for the NFN instrument as of the System Effective Date. Note: This field is only available for NFN instruments with the Registration Body of CSA (Canadian Securities Administration)
Authorized Shares <i>(New field as of 5/19/2025)</i>	12 characters, alphanumeric	Denotes the number of authorized shares for the private stock.
Authorized Shares Date <i>(New field as of 5/19/2025)</i>	Date, MM/DD/YYYY	Indicates the “As of” Date associated with the authorized shares field above.
System Note	Text up to 300 characters	Denotes any special processing notes from NFN Operations for the current business day that are not NFN instrument specific. This field does not apply to the individual Daily List records, this field is previously part of the “Closing Record” and is the field previously known as “Note for Day”.

Closing Record *(REMOVED as of 11/18/2024)*

Data Field	Field Format	Description
Parameter <i>(Removed as of 11/18/2024)</i>	40 characters, alphanumeric (including special characters)	Restatement of the file query parameter as entered by the user. Daily List File Name: DLAdvance or DLNextDay

NFN Daily List

Data Field	Field Format	Description
		Date of Daily List: MM/DD/YYYY
Note for Day (Removed as of 11/18/2024)	Text up to 300 characters	Denotes any special processing notes from NFN Operations for the current business day that are not NFN instrument specific.

Event Code Descriptions

As noted above, each NFN Daily List record includes an Event Code to denote the type of record change that is being reported. In the table below, Nasdaq outlines how the Event Codes will be generated.

Event Codes	Event Description	Daily List Version	Daily List Processing Notes
Addition	A new NFN registration application submitted with final documentation	Advanced Notification Next Day	Supported on all versions of Daily List files. On the Advanced Notification list, NFN Operations will post an Addition record as soon as it notified of the planned action. If the issuer changes its plans, NFN Operations may post multiple Addition records to the Advanced Notification list. On the Next Day list, NFN will only show the final Addition record.
Deletion	A delete instrument request for an existing NFN instrument	Advanced Notification Next Day	Supported on all versions of the Daily List files. On the Advanced Notification list, NFN Operations will post a Deletion record as soon as it notified of the planned action. If the issuer changes its plans, NFN Operations may post multiple Deletion records to the Advanced Notification list. On the Next Day list, NFN will only show the final Deletion record.
Replacement	A combined action in which a firm is adding a new instrument at the same time as it is deleting an expiring instrument	Advanced Notification Next Day	Supported on all versions of Daily List files. On the Advanced Notification list, NFN Operations will post a Replacement record as soon as it notified of the planned action. If the issuer changes its plans, NFN Operations may post multiple Replacement records to the Advanced Notification list. On the Next Day list, NFN will only show the final Replacement record.
Attribute Change	A modification to one of the security attributes for a live NFN instrument. Firms should compare current and new field values to determine the	Advance Notifications Next Day	Supported on all versions of Daily List files. Corporate Action Date = Date NFN Issuer reported that the security change action was instituted on its end.

NFN Daily List

	fields impacted by the change request.		<p>On the Advanced Notification list, NFN Operations will post an Attribute Change record as soon as it notified of the planned action. If the issuer changes its plans, NFN Operations may post multiple Attribute Change records to the Advanced Notification list.</p> <p>On the Next Day list, NFN will only show the final Attribute Change record.</p>
Restore	A reversal of a NFN instrument deletion.	<p>Advanced Notification</p> <p>Next Day</p>	<p>If an instrument is removed from the NFN system in error, Nasdaq will use the Restore event code to reverse the Deletion action. Given that most firms want to resume pricing of an instrument as quickly as possible, the Restore records should always appear in the Next Day file.</p>
Withdraw – Addition	A cancellation of a previously announced Addition to the NFN system.	<p>Advanced Notification</p> <p>Next Day</p>	<p>As noted above, Nasdaq will be adding Withdraw event codes to notify the vendor community of a cancelled NFN listing action.</p> <p>The Withdraw event should always appear on the Advanced Notification list.</p> <p>The Withdraw event will only appear on the Next Day list, however, if the issuer waits to the last minute to notify NFN Operations of the cancelled action.</p>
Withdraw – Deletion	A cancellation of a previously announced Deletion from the NFN system.	<p>Advanced Notification</p> <p>Next Day</p>	<p>As noted above, Nasdaq will be adding Withdraw event codes to notify the vendor community of a cancelled NFN listing action.</p> <p>The Withdraw event should always appear on the Advanced Notification list.</p> <p>The Withdraw event will only appear on the Next Day list, however, if the issuer waits to the last minute to notify NFN Operations of the cancelled action.</p>
Withdraw – Replacement	A cancellation of a previously announced Replacement action on the NFN system.	<p>Advanced Notification</p> <p>Next Day</p>	<p>As noted above, Nasdaq will be adding Withdraw event codes to notify the vendor community of a cancelled NFN listing action.</p> <p>The Withdraw event should always appear on the Advanced Notification list.</p> <p>The Withdraw event will only appear on the Next Day list, however, if the issuer waits to the last minute to notify NFN Operations of the cancelled action.</p>
Withdraw – Attribute Change	A cancellation of a previously announced Attribute Change.	<p>Advanced Notification</p>	<p>As noted above, Nasdaq will be adding Withdraw event codes to notify the vendor community of a cancelled NFN listing action.</p>

NFN Daily List

		Next Day	<p>The Withdraw event should always appear on the Advanced Notification list.</p> <p>The Withdraw event will only appear on the Next Day list, however, if the issuer waits to the last minute to notify NFN Operations of the cancelled action.</p>
Withdraw – Restore	A cancellation of a previously announced NFN instrument restore	Advanced Notification Next Day	Although Nasdaq would rarely, if ever, use this event code, it could theoretically need to withdraw a NFN instrument restore action. If it were to need to cancel the action, the Withdraw event would appear on both the Advanced Notification and Next Day lists.

NFN Daily List Posting Time

The NFN Daily List posting is a manual process performed by the NFN Operations department. NFN Operations will make every attempt to post the NFN Daily List files by 12 noon, ET. On occasion, NFN Operations may modify a record after the initial NFN Daily List files are posted. Nasdaq, therefore, recommends that firms check the NFN website for NFN Daily List file updates up until 6:00 p.m., Eastern Time.

NFN Directory

Web Service Parameters

To retrieve the NFN Directory, Web Service Users shall need to enter a call with the following parameters:

- **Documentation File Name:** User should enter **InstrumentDirectory**.
- **Date of Directory:** Data should be entered in MM-DD-YYYY or MM/DD/YYYY format. This is an optional operator.
- **File Type:** Data should indicate requested file format. Options: “XML” for XML formatted text, “pipe” for pipe (|) delimited text, “CSV” for CSV formatted text, or “JSON” for JSON format.
 - File type will be requested via Accept HTTP Header. Supported values for Accept Header are: text/csv, text/json, text/pipe, type/xml

<https://nfn.nasdaq.com/servicecall/InstrumentDirectory.ashx?Date=MM-DD-YYYY&Type=pipe>

New NFN Web Service calls as of November 18, 2024:

<https://api.nfn.nasdaq.com/servicecall/InstrumentDirectory.ashx>

Directory File Format

Nasdaq will update its NFN Directory file to reflect of the active instruments at the start of each business day. Within the file, Nasdaq will include a header row with the field names. Within the file, the individual security records will appear as outlined below in alphabetic order based on the NFN Symbol field. As the last record in the file, Nasdaq will denote the Web Service request date (MM/DD/YYYY) and Web Service request time (HHMMSS).

Security Level Details

Data Field	Field Format	Description																
Symbol	11 characters, alphanumeric	Denotes the current Nasdaq-assigned identifier for NFN instrument.																
Instrument Name	Text up to 150 characters	Denotes the name of the NFN instrument as it appears on the prospectus document. Abbreviations may be used for NFN issue names over 150 characters.																
Issuer Name	Text up to 75 characters	Denotes the firm name for the issuer of the NFN instrument.																
Instrument Type / Tier	2 characters, alphanumeric	Denotes the NFN security class and listing tier for the instrument. T	Open to New Investors															
Exchange Code for Listed Instruments	4 characters, alphanumeric	Denotes the ISO 10383 Market Identification Codes (MICs) for the primary listing market center for a NFN instrument, if applicable.														

NFN Daily List

Data Field	Field Format	Description								
		(Note: In the U.S., this field is typically populated only for closed-end funds / exchange traded funds or structured products.)								
Exchange Symbol For Listed Instruments	11 characters, alphanumeric	Denotes the ticker identifier assigned by the primary listing market for the NFN instrument, if applicable.								
Newspaper Category	20 characters, alphanumeric	Denotes the fund family heading to be used for the NFN instrument in U.S. newspaper price tables. (Note: This field is only populated for the two news media list fund types – MF and \$\$.)								
Newspaper Abbreviation	16 characters, alphanumeric	Denotes the identifier to be used for the NFN instrument in U.S. newspaper price tables. (Note: This field is only populated for the two news media list fund types – MF and \$\$.)								
Deposit Date	10 character, numeric	Denotes the date on which the NFN instrument is scheduled to deposit. Please note that this field is typically populated for UITs and structured products. Date field is stored in MM/DD/YYYY.								
Termination Date	10 character, numeric	Denotes the date on which the NFN instrument is scheduled to mature or terminate. Please note that this field is typically populated for UITs and structured products. Date field is stored in MM/DD/YYYY.								
Par Value Per Unit / Share	12 characters, alphanumeric	Denotes the par value per share or per unit for a NFN instrument. Please note that this field is typically only populated for debt-based instruments. If provided, the value will be stated in \$\$\$\$\$.dddddd format. If unavailable, this field will be space filled.								
NSCC Clearing Eligible	1 character, alphanumeric	Denotes if the NFN instrument is National Securities Clearing Corporation (NSCC) eligible. The allowable values are: <table border="1" data-bbox="792 1436 1398 1734"> <thead> <tr> <th>Code</th> <th>Value</th> </tr> </thead> <tbody> <tr> <td>T</td> <td>True. NFN issuer has indicated that this instrument is NSCC clearing eligible.</td> </tr> <tr> <td>F</td> <td>False. NFN issuer has indicated that this instrument is <u>not</u> NSCC clearing eligible.</td> </tr> <tr> <td><space></td> <td>Not Applicable. NFN issuer did not provide NSCC eligibility status.</td> </tr> </tbody> </table>	Code	Value	T	True. NFN issuer has indicated that this instrument is NSCC clearing eligible.	F	False. SRRI	1 character, numeric	Denotes the measurement of Risk and Reward of a UCITS instrument. Please note this field is required for UCITS registered instruments.																				
SRRI Record Date	Date, MM/DD/YYYY	Denotes the date of the SRRI rating.																				
FIGI	12 characters, alphanumeric	Denotes the FIGI identifier as assigned by Bloomberg																				
Share Class Launch Date	Date, MM/DD/YYYY	Denotes the Share Class Launch Date for the NFN registered instrument. Please note that the Share Class Launch Date is an optional data field for UCITS registered instruments.																				
Minimal Subsequent Subscription Amount in Shares	4 characters, numeric	Denotes the Minimal Subsequent Subscription Amount in Shares for the NFN instrument as of the Corporate Action date. Data format XXXX. Please note that the Minimal Subsequent Subscription Amount in Shares is an optional data field for UCITS registered instruments.																				
Minimal Initial Subscription Amount in Shares	4 characters, numeric	Denotes the Minimal Initial Subscription Amount in Shares for the NFN instrument as of the Corporate Action date. Data format XXXX. Please note that the Minimal Initial Subscription Amount in Shares is an optional data field for UCITS registered instruments.																				

NFN Daily List

Data Field	Field Format	Description
Canadian Identifier	25 characters, alphanumeric	Denotes the Canadian Identifier for the NFN instrument as provided by the NFN Issuer. Note: This field is only available for NFN instruments with Registration Body of CSA - Canadian Securities Administration.
Authorized Shares <i>(New field as of 5/19/2025)</i>	12 characters, alphanumeric	Denotes the number of authorized shares for the private stock.
Authorized Shares Date <i>(New field as of 5/19/2025)</i>	Date, MM/DD/YYYY	Indicates the "As of" Date associated with the Authorized Shares field above.

Documentation Posting Service

Web Service Parameters

To retrieve the Documentation Posting Daily List file, Web Service Users shall need to enter a call with the following parameters:

- **Documentation File Name:** User should enter **DocPost.**
- **Date of Documentation File:** Data should be entered in MM-DD-YYYY or MM/DD/YYYY format.
- **File Type:** Data should indicate requested file format. Options: "XML" for XML formatted text, "pipe" for pipe (|) delimited text, "CSV" for CSV formatted text, or "JSON" for JSON format.
 - File type will be requested via Accept HTTP Header. Supported values for Accept Header are: text/csv, text/json, text/pipe, type/xml

<https://nfn.nasdaq.com/servicecall/DocPost.ashx?Date=MM-DD-YYYY&Type=pipe>

New NFN Web Service calls as of November 18, 2024:

<https://api.nfn.nasdaq.com/servicecall/DocPost.ashx?Date=MM-DD-YYYY>

Documentation Posting Service File Format

With the implementation of the NFN Daily List, Nasdaq allows Issuers / Pricing Agents to post certain financial documentation for NFN Instruments for the market data vendors to access. To facilitate the retrieval process, Nasdaq will create a daily file that lists the financial documentation with the current day's posting date.

Security Level Details

Data Field	Field Format	Description
Posting Date	Date, MM/DD/YYYY	Denotes the date on which the NFN Documentation List file was generated. Date field is stored in MM/DD/YYYY format.
Posting Time	Time, HHMMSS	Denotes the time that the NFN Documentation List file was generated. The time will be stated in HHMMSS format. The time is based on US Eastern Time.
Symbol	11 characters, alphanumeric	Denotes the Nasdaq-assigned identifier for NFN instrument at the time of the NFN Documentation List file posting.

NFN Daily List

Data Field	Field Format	Description																										
		<p>If there is an associated registration action, the Symbol will follow the following rules:</p> <ul style="list-style-type: none"> • For instrument addition actions, the field will match the Symbol – New value from the Daily List – Next Day file. • For replacement actions, the field will reflect the Symbol - New value from the Daily List – Next Day file. • For instrument attribute change actions, the field will reflect the Symbol – Current value from the Daily List – Next Day file. • For deletion actions, the field will reflect the Symbol – Current value from the Daily List – Next Day file. 																										
Instrument Name	Text up to 150 characters	Denotes the Instrument (Issue) Name in the NFN system at the time of the NFN Documentation List file posting.																										
CUSIP	9 characters, alphanumeric	Denotes the CUSIP number in the NFN system at the time of the NFN Documentation List file posting. Please note that Nasdaq will only populate this field for recipient firms with a valid CUSIP license and entitlement token.																										
Country of Issuance	2 characters, alphanumeric	Denotes listed as the primary registration location for the issuance. For this field, Nasdaq will use ISO 3166 country codes .																										
ISIN	12 characters, alphanumeric	<p>Denotes the International Security Identification Number (ISIN) for the NFN Instrument at the time of the NFN Documentation List file posting. The ISIN should map to the country of issuance.</p> <p>(Note: This field is optional for NFN instruments based in the United States.)</p>																										
Instrument Type / Tier	2 characters, alphanumeric	<p>Denotes the NFN security class and listing tier for the instrument on the stated System effective date. NFN Daily List

Data Field	Field Format	Description						
Documentation URL	URL Address	NFN file name / file path from which the actual document can be accessed and downloaded.						
Test Symbol Flag	1 character, alphanumeric	Denotes if the instrument is set up as a live or test issue currently in the NFN system. The allowable values are: <table border="1" style="margin-left: 20px;"> <thead> <tr> <th>Code</th> <th>Value</th> </tr> </thead> <tbody> <tr> <td>T</td> <td>NFN Test Symbol. Instrument is intended for test use only.</td> </tr> <tr> <td>F</td> <td>NFN Live Symbol. Instrument is set up as live / production in NFN system.</td> </tr> </tbody> </table>	Code	Value	T	NFN Test Symbol. Instrument is intended for test use only.	F	NFN Live Symbol. Instrument is set up as live / production in NFN system.
Code	Value							
T	NFN Test Symbol. Instrument is intended for test use only.							
F	NFN Live Symbol. Instrument is set up as live / production in NFN system.							
Issuer Name	75 characters, alphanumeric	Denotes the name of the Issuer / Sponsor for the NFN instrument at the time of the NFN Document Posting Service file posting.						
Creation Date	Date, MM/DD/YYYY	Denotes the date the document was created in the NFN system. Date field is stored in MM/DD/YYYY format.						

Once the Documentation List is downloaded, the user may automate access to the individual PDF documents by generating a Web Service request for each of the NFN Documentation File Names provided in the file.

NFN Product Directory

Web Service Parameters

To retrieve the NFN Product Directory, Web Service Users shall need to enter a call with the following parameters:

- Issuer CUSIP: First 6 of the CUSIP assigned to the issuer by CUSIP and registered with Nasdaq Fund Network Operations.
- Product Symbol: 13 character Product Symbol assigned by Nasdaq Fund Network Operations. This is an optional operator.
- File Type: Data should indicate requested file format. Options: "XML" for XML formatted text, "pipe" for pipe (|) delimited text, "CSV" for CSV formatted text, or "JSON" for JSON format.
File type will be requested via Accept HTTP Header. Supported values for Accept Header are: text/csv, text/json, text/pipe, type/xml

[https://nfn.nasdaq.com/servicecall/RootDirectory.ashx?issuercusip=\[issuercusip\]&ROOTSYMBOL=\[rootsymbol\]&Type=pipe](https://nfn.nasdaq.com/servicecall/RootDirectory.ashx?issuercusip=[issuercusip]&ROOTSYMBOL=[rootsymbol]&Type=pipe)

New NFN Web Service calls as of November 18, 2024:

[https://api.nfn.nasdaq.com/servicecall/ProductDirectory.ashx?issuercusip=\[issuercusip\]&PRODUCTSYMBOL=\[productsymbol\]](https://api.nfn.nasdaq.com/servicecall/ProductDirectory.ashx?issuercusip=[issuercusip]&PRODUCTSYMBOL=[productsymbol])

Product Directory File Format

Nasdaq will update its NFN Product Directory file to reflect of the active Products. Within the file, Nasdaq will include a header row with the field names. Within the file, the individual security records will appear as outlined below in alphabetic order based on the Symbol field.

Security Level Details

Data Field	Field Format	Description																						
Issuer Name	Text up to 75 characters	Denotes the name of the Issuer / Sponsor for the NFN Product.

Product Directory Dynamic File Format

Within the Product Directory file are dynamic tables that provide information for the multi select options in the Product directory. These files follow the above options with headers.

- The headers for the Product Directory files are 5 "=", followed by the Category Name, padded with "=" to 100 characters.

Asset Category

Denotes the broad focus and objective of this asset's exposure.

URL as of 11/18/2024: <https://api.nfn.nasdaq.com/servicecall/productassetcategory>

For a current list of options [are available upon request from NFNops@nasdaq.com](mailto:NFNops@nasdaq.com) . .

NFN Daily List

Data Field	Field Format	Description
Header	100 characters	5 "=", "Asset Category", Padded "=" to 100
Asset Category	40 characters, alphanumeric	Denotes the options for this field. Options in this field are subject to change as requested by issuers. A current list of options available upon request to NFNOps@nasdaq.com .
Product Symbol	13 characters, alphanumeric	Denotes the Product Symbol assigned by Nasdaq.

Portfolio Top Holdings

Denotes the broad focus and objective of this asset's exposure. NFN Portfolio Top Holdings download will be limited to the top 20 holdings.

URL as of 11/18/2024: <https://api.nfn.nasdaq.com/servicecall/productholdings>

For full holdings report, you can send a request to [NFNOps@nasdaq.com](mailto:NFNops@nasdaq.com).

Product Symbol	13 characters, alphanumeric	Denotes the Product Symbol assigned by Nasdaq.
Region	50 characters, alphanumeric	Denotes the region name. A list of options is available upon request from NFNOps@nasdaq.com .
Region Weight	XXX.XXX	Denotes the percentage of exposure to the specific region, expressed as a percentage. Percentage will not exceed 100%.

Management

The team of professional in charge of this investment discipline.

URL as of 11/18/2024: <https://api.nfn.nasdaq.com/servicecall/productmanagement>

Data Field	Field Format	Description
Header	100 characters	5 "=", "Management", "=" to 100
Product Symbol	13 characters, alphanumeric	Denotes the Product Symbol assigned by Nasdaq.
Fund Manager Name	30 characters, alphanumeric	Denotes the Name of the professional in charge of the investment discipline
Management Tenure	Up to 2147483647	Denotes the number of years management has serviced this fund based on Fund Manager Start Date.
Fund Manager Start Date	Date, YYYY	Denotes the year that the fund manager began managing the fund.
Industry Start	Date, YYYY	Denotes the year that the Fund Manager started in the industry.

Issuer Directory

Web Service Parameters

To retrieve the Issuer Directory, Web Service Users shall need to enter a call with the following parameters:

- **Issuer Directory File Name:** User should enter **Issuer**.
- **File Type:** Data should indicate requested file format. Options: "XML" for XML formatted text, "pipe" for pipe (|) delimited text, "CSV" for CSV formatted text, or "JSON" for JSON format.
 - File type will be requested via Accept HTTP Header. Supported values for Accept Header are: text/csv, text/json, text/pipe, type/xml

<https://nfn.nasdaq.com/servicecall/IssuerDirectory.ashx?type=PIPE>

New NFN Web Service calls as of November 18, 2024:

<https://api.nfn.nasdaq.com/servicecall/IssuerDirectory.ashx?>

Issuer Directory File Format

Nasdaq will update its Issuer Directory file to reflect of the active Issuer. Within the file, Nasdaq will include a header row with the field names. Within the file, the individual records will appear as outlined below in alphabetic order based on the Issuer Name field.

Security Level Details

Data Field	Field Format	Description
Issuer Name	75 characters, alphanumeric	Denotes the name of the Issuer / Sponsor as registered with NFN.

Data Field	Field Format	Description
Description	500 characters, alphanumeric	Denotes the description of the Issuer.
Website	Up to 2048 characters, alphanumeric	Denotes the URL for the Issuer's public website.
Headquarters Location	300 characters, alphanumeric	Denotes the physical address of the Issuer headquarter location.
Total Assets Under Management	10 characters, numeric	Denotes the Total Assets Under Management for the Issuer.
Total Assets Under Management Date	Date, MM/DD/YYYY	Denotes the Date of Total Assets Under Management for the Issuer.
In Business Since	4 characters, numeric	Denotes the year that the Issuer began operation. Year expressed as YYYY.
Investor Relations Phone	20 characters, numeric	Denotes the phone number for Investor Relations.
Investor Relations Email	400 characters, alphanumeric	Denotes the email address for Investor Relations.
Live Instruments Count	11 characters, alphanumeric	Denotes the number of Live instruments listed with NFN under the issuer.
Investor Invested Assets	11 characters, numeric	Denotes the amount of investor assets invested.

Expense Report

Web Service Parameters

To retrieve the Expense Report, Web Service Users shall need to enter a call with the following parameters:

- **Expense File Name:** User should enter **Expense**.
- **File Type:** File type will be requested via Accept HTTP Header. Supported values for Accept Header are: text/csv, text/json, text/pipe, type/xml

[https://api.nasdaq.com/servicecall/expense.ashx?nsm=\[nasdaqsecuritymaster\]](https://api.nasdaq.com/servicecall/expense.ashx?nsm=[nasdaqsecuritymaster])

Expense Report File Format

Nasdaq will update its NFN Expense file to reflect of the active instrument. Within the file, Nasdaq will include a header row with the field names. Within the file, the individual security records will appear as outlined below in alphabetic order based on the Symbol field.

Security Level Details

Data Field	Field Format	Description
Symbol	11 characters, alphanumeric	Denotes the Nasdaq-assigned identifier for NFN instrument reflected in the Dividend/Interest or Capital Distribution record.
Nasdaq Security Master	10 characters, alphanumeric	Denotes the Nasdaq Security Master, as created by the NFN system, for the NFN instrument as of the System Effective Date.

NFN Daily List

Data Field	Field Format	Description
		<p>The processing rules by action are as follows:</p> <ul style="list-style-type: none"> For addition actions, this field will reflect the Nasdaq Security Master for the instrument being added to the system. For replacement actions, this field will reflect the Nasdaq Security Master for the instrument being added to the system. For attribute change actions, this field will reflect the Nasdaq Security Master as of the System effective date. For deletion actions, this field will reflect the Nasdaq Security Master for the instrument being removed from the system. <p>For restore actions, this field will reflect the Nasdaq Security Master for the instrument being reinstated to the NFN system.</p>
Expense as of Date	Date, MMDDYYYY	Denotes the Date of Expense

Web Service Parameters

To retrieve the Ex-Date Report, Web Service Users shall need to enter a call with the following parameters:

- **Ex-Date File Name:** User should enter **ExDate**.
- **Date for Ex-Date File:** User should enter the ex-date filter to be applied to the report. Data should be entered in **MM-DD-YYYY** or **MM/DD/YYYY** format. Please note the following report date limitations:
 - The Ex-Date Report will only return Dividend/Interest or Capital Distribution records entered into the NFN system on or after February 2017.
- **File Type:** Data should indicate requested file format. Options: “XML” for XML formatted text, “pipe” for pipe (|) delimited text, “CSV” for CSV formatted text, or “JSON” for JSON format.

<https://nfn.nasdaq.com/servicecall/exdate.ashx?type=CSV&date=MM/DD/YYYY>

Ex-Date Report File Format

Nasdaq allows NFN pricing agents to enter advance notifications of Dividend/Interest and Capital Distribution actions. To ensure that the market data community has access to these corporate actions on the appropriate ex-date, Nasdaq is adding the Ex-Date Report to the NFN Daily List product.

Security Level Details

Data Field	Field Format	Description																						
Symbol	11 characters, alphanumeric	Denotes the Nasdaq-assigned identifier for NFN instrument reflected in the Dividend/Interest or Capital Distribution record.																						
CUSIP	9 characters, alphanumeric	Denotes the CUSIP number for the NFN instrument in the NFN system at the time that the Ex-Date Report was generated. Please note that Nasdaq will only populate this field for recipient firms with a valid CUSIP license and entitlement token.																						
Instrument Type / Tier	2 characters, alphanumeric	Denotes the NFN Fund Type and Listing Tier for the NFN instrument in the NFN system at the time that the Ex-Date Report was generated. The allowable values are: <table border="1" style="margin-left: 20px;"> <thead> <tr> <th>Code</th> <th>Value</th> </tr> </thead> <tbody> <tr> <td>MF</td> <td>Mutual Fund – News Media List</td> </tr> <tr> <td>MS</td> <td>Mutual Fund – Supplemental List</td> </tr> <tr> <td>\$\$</td> <td>Money Market Fund – News Media List</td> </tr> <tr> <td>\$S</td> <td>Money Market Fund – Supplemental List</td> </tr> <tr> <td>US</td> <td>Unit Investment Trust (UIT)</td> </tr> <tr> <td>AN</td> <td>Annuity</td> </tr> <tr> <td>SP</td> <td>Structured Product</td> </tr> <tr> <td>AP</td> <td>Alternative Investment Product (AIP)</td> </tr> <tr> <td>EM</td> <td>Private Stock</td> </tr> <tr> <td>MA</td> <td>Managed Accounts</td> </tr> </tbody> </table>	Code	Value	MF	Mutual Fund – News Media List	MS	Mutual Fund – Supplemental List	\$\$	Money Market Fund – News Media List	\$S	Money Market Fund – Supplemental List	US	Unit Investment Trust (UIT)	AN	Annuity	SP	Structured Product	AP	Alternative Investment Product (AIP)	EM	Private Stock	MA	Managed Accounts
