Information on the Notes

Merrill Lynch & Co., Inc. (the "Issuer") has issued Accelerated Return Notes ("Notes") linked to the Dow Jones EURO STOXX 50 Index (the "Index"). The Notes were priced at \$10.00 each and mature on July 10, 2008. As more fully set forth in the Prospectus Supplement, each \$10.00 principal amount of the securities will be deemed a "Unit" for purposes of trading and transfer. There will be no payments or redemptions prior to the maturity date.

At maturity, the Notes will provide full exposure to any downside movement in the Index and will provide triple exposure to any upside movement in the Index, subject to a maximum payment at maturity of \$12.334 per unit.

At maturity, investors will receive:

- (1) If the Ending Value is less than or equal to the Starting Value, the investor receives:
 $\$10 \times (\text{Ending Value} / \text{Starting Value})$; or
- (2) If the Ending Value is greater than the Starting Value, the investor will receive:
 $\$10 + \$30 \times ((\text{Ending Value} - \text{Starting Value}) / \text{Starting Value})$

Subject to maximum total payment at maturity of \$12.334 per unit.

The Starting Value for the Index is 4,427.32. See the Prospectus Supplement for information on how the Ending Value will be calculated.

It is expected that the market value of the Notes will depend substantially on the value of the Index and can be affected by a number of other interrelated factors including, among other things: the general level of interest rates, the volatility of the Index, the time remaining to maturity, the dividend yields of the stocks comprising the Index and the credit ratings of the Issuer. Unlike ordinary debt securities, the Notes do not pay interest. Investing in the Notes is not equivalent to investing in the Index or its component stocks.

The Notes are senior unsecured debt securities of Merrill Lynch & Co., Inc.
