Information on the Notes

Merrill Lynch & Co., Inc. (the "Issuer") has issued Strategic Accelerated Redemption Securities ("STARS") linked to the Dow Jones Industrial Average (the "Index"). The STARS were priced at \$10 each and mature on July 7, 2010.

The STARS are senior, unsecured debt securities of the Issuer that provide for an automatic call of the securities if the closing level of the Index on any observation date is greater than or equal to the Starting Value of the Index, 11,811.83.

If the STARS are called on any observation date, investors will receive a payment of:

- If called in July 2009: \$11.2650 per STARS;
- If called in January 2009: \$11.8975 per STARS;
- If called in June 2010: \$12.5300 per unit.

If the STARS are not called prior to the maturity date, then at maturity, investors will receive:

- If the Ending Value is greater than or equal to the Threshold Value:

\$10

- If the Ending Value is less than the Threshold Value:

$\$10 + [\$10 \times ((\text{Ending Index Value} - \text{Threshold Value}) / \text{Starting Value}) \times 1]$

The Starting Value of the Dow Jones Industrial Average equals: 11,811.83. The Threshold Value is 10,630.647. The Ending Value will be calculated near the maturity date.

Please see the prospectus for the STARS for more details regarding the calculations.

It is expected that the market value of the STARS will depend substantially on the value of the Index and may be affected by a number of other interrelated factors including, among other things: the general level of interest rates, the volatility of the Index, the time remaining to maturity, the dividend yield of the stocks comprising the Index, and the credit ratings of the Issuer.
